

NATURE'S SUNSHINE®

AUTHENTIC ESSENTIAL OILS

THE WAY NATURE INTENDED

NATURE'S POWER

Made from the aromatic essence of plants, essential oils have the power to cleanse the body and rejuvenate and elevate the mind. Only Nature's Sunshine is wholly committed to making our full line of essential oils as absolutely pure, authentic and genuine as Mother Nature herself.

NSP ensures the authenticity and integrity of our oils, with the ability to trace each bottle back to the exact distiller, farmer and even plant from which the oil originated. The true power and value of an essential oil lies in its purity. And this is our promise: every bottle of essential oil is absolutely pure...down to the last drop.

AUTHENTIC, ORGANIC AND WILD

Guaranteed authenticity and unmatched purity are Nature's Sunshine's ultimate measure for all our essential oils. As a result, many of our oils also qualify for additional designations like Certified Organic, organically grown and wild-harvested.

Organic Oils: Certified Organic oils are officially recognized by the National Organic Program, the same level of certification used for USDA Organic labeling. This means that oils are produced sustainably, without the use of synthetic pesticides or chemical fertilizers.

Organically Grown Oils: NSP scours the globe to find the highest quality plant sources. Hence, our oils often come from small, family-owned farms in developing regions as remote as Tunisia or Madagascar. While these farms follow organic cultivation practices, they simply cannot meet the high costs of Organic certification. We list oils that come from these farms as 'organically grown.' Botanical supply experts inspect sites to ensure that organic practices are in place and, as with all our oils, third party and in-house GC/MS testing verifies the materials are pure and free of contaminants like chemical pesticides, herbicides, fertilizers or other adulterants.

Wild-Harvested Oils: Wild-harvested oils come from plants growing as they are found in nature. Untamed, free and natural, these plants are watered by the rain and nourished by the soil and sun. They are untouched by the hands of man until harvest time.

SCENT FAMILIES

Although essential oils have been used since ancient times for spiritual, cleansing and ceremonial purposes, the study of aromatherapy is relatively new, dating back to the early 1900s. When faced with the vast array of aromatic notes provided by the plant kingdom, early aromatherapists simplified and categorized oils by scent. NSP follows a variation of the Scent Family system, organizing our oils into six groups that have common aromatic elements: Citrus, Herbal, Floral, Spice, Wood and Cool.

CITRUS SCENT FAMILY

Citrus essential oils' fresh, crisp and tangy scent uplifts and elevates.

Citrus Oils: Lemon, Pink Grapefruit, Bergamot, Red Mandarin

HERBAL SCENT FAMILY

The rich, hearty and earthy notes of herbaceous oils balance, soothe and brighten.

Herbal Oils: Wild Oregano, Wild Sweet Thyme, Sweet Marjoram, Patchouli, Lemongrass, Clary Sage

FLORAL SCENT FAMILY

Lovely, rich and complex, floral oils calm, clarify, nurture and reassure.

Floral Oils: Organic Lavender, Organic Geranium, Organic Ylang Ylang, Jasmine, Rose, Organic Neroli, Roman Chamomile, Organic Helichrysum

SPICE SCENT FAMILY

Spice oils' warm, spicy and rich aromas stimulate, motivate and fortify.

Spice Oils: Cinnamon Leaf, Clove Bud

WOOD SCENT FAMILY

Woody, rich, robust and luxurious, these oils center, elevate and harmonize.

Wood Oils: Organic Frankincense, Wild Myrrh, Sandalwood

COOL SCENT FAMILY

Cool oil scents are fresh, minty, clean and crisp, which mean they can stimulate, refresh and invigorate.

Cool Oils: Tea Tree, Peppermint, Eucalyptus, Pine Needle, Wild Rosemary

ESSENTIAL OIL BLENDS

These blends were specially formulated with oils that work together to evoke specific moods and mindsets as well as address particular needs.

Oil Blends: INSPIRE Uplifting, CORE Balancing, BREATHE DEEP, REFUGE Calming, RECOVER Soothing, CHANGES Women's Health ESSENTIAL SHIELD, Tei-Fu® Soothing

RECOMMENDED USES

Essential oils may be used aromatically or topically in a variety of ways, including diffusers, massage, compresses, baths, scrubs, lotions and sprays. Check each oil for recommended use and warnings as some oils may cause skin sensitivity or photosensitivity.

COMPLEMENTARY PRODUCTS

Flower Essences, Nature's Fresh Enzyme Spray, Nebulizing Diffuser, Aroma Ball Plug-in Diffuser
