

LIQUID CHLOROPHYLL ES™

Protect and Strengthen Healthy Cells

Go extra green. This extra-strength, paraben-free formula features a more potent level of chlorophyll—the green pigment in plants responsible for harnessing the sun's energy in photosynthesis. Known to support your body on both a molecular and cellular level, chlorophyll promotes circulatory, intestinal, digestive and immune health. Featuring a proprietary chlorophyll complex, this minty fresh formula also helps neutralize body odors and acts as a natural, “internal” deodorant. Boost your energy and overall well-being today with Liquid Chlorophyll ES.*

BENEFITS

- Helps promote the natural blood-cleansing functions of the body*
- Promotes circulatory, intestinal, digestive and immune health*
- Protects and strengthens healthy cells*
- Encourages balanced pH levels in the body*
- Deodorizes the body, including the bowel*
- Paraben free*

KEY INGREDIENT

- Proprietary chlorophyll complex—the most critical molecule in the plant world, chlorophyll is found in all green plants and vegetables. It's particularly concentrated in spinach and wheatgrass.

The sodium copper chlorophyll form contained in Nature's Sunshine Liquid Chlorophyll ES is soluble in water. With the exception of a magnesium atom,

chlorophyll's structure is identical to hemoglobin, the molecule that carries oxygen in the blood, so it is thought to assist with natural blood-cleansing and to support healthy circulation. It also may support digestive health, toxin elimination and regularity. Like curcumin, chlorophyll acts as a particularly potent natural antioxidant that may help keep cells healthy by protecting them from oxidative damage.

Our proprietary complex also includes refreshing spearmint oil, a natural odor fighter.*

RECOMMENDED USE

Mix 1 teaspoon (5 ml) in an 8 ounce glass of Nature's Spring water twice daily. Refrigerate after opening.

FREQUENTLY ASKED QUESTIONS (FAQs)

SHOULD I TAKE LIQUID CHLOROPHYLL ES DAILY?

Yes, Liquid Chlorophyll ES is a refreshing addition to a glass of water and can be taken multiple times daily.

WHAT IS "PH BALANCING" AND WHY IS IT IMPORTANT FOR HEALTH?

The typical Western diet—heavy in red meat, sugary treats and refined grains—tends to create an acidic internal environment, which can cause problems such as deficiencies of key minerals like calcium, magnesium and potassium. Eating more alkaline foods such as chlorophyll-rich, green, leafy vegetables can help restore balance, which may support improved immune function and overall health.*

WHAT IS THE DIFFERENCE BETWEEN LIQUID CHLOROPHYLL AND LIQUID CHLOROPHYLL ES?

The "ES" in Liquid Chlorophyll ES stands for "extra strength." Liquid Chlorophyll ES contains more than twice the amount of chlorophyll per serving than Liquid Chlorophyll and is paraben-free.
